

## GEOMETRY, TOPOLOGY, AND PHYSICS SEMINAR

# Regularization and Renormalization of Sigma Models

Dave Morrison  
UCSB

Friday, March 9, 2007, 3:30 p.m.  
Room 6635 South Hall

**Abstract:** In a lecture in December, I briefly discussed the dimensional regularization of sigma models, which is the technical tool underlying the calculation of Ricci flow as the one-loop approximation to renormalization flow on the space of Riemannian metrics on a manifold. In this week's lecture will I give a detailed presentation of dimensional regularization and the renormalization calculations.

Information about future meetings of this seminar can be found at
