The Birational Geometry of Surfaces with Rational Double Points

David R. Morrison

Department of Mathematics, Duke University, Durham, NC 27706, USA

Math. Ann. **271**, 415–438 (1985)

There is an error in the Appendix of this paper, which I detected in September, 1990 when transferring its formulas into the symbolic manipulation language MAPLE. The formula on p. 437 for the map to \mathbb{C}^3 in the case of E_6 should read:

$$\begin{aligned}x &= 4u_0^2(u_0^2v_0^3 - 1)^3(u_0^2v_0^3 + 1) = \frac{4v_6^2(1 + 2u_6^3v_6^2)}{(1 + u_6^3v_6^2)^2} \\y &= 4u_0^2v_0(u_0^2v_0^3 - 1)^2 = \frac{4u_6v_6^2}{1 + u_6^3v_6^2} \\z &= 2u_0(u_0^2v_0^3 - 1)^2 = \frac{2v_6}{1 + u_6^3v_6^2}\end{aligned}$$

All other formulas in the Appendix are correct.
